

## PUBLIC INFORMATION SYMBOLS FOR HEALTH CARE FACILITIES SURVEY

---

The purpose of this survey is to determine the chance these symbols have of being understood. Every page in this survey shows five or six symbols in a circle. The meaning of these symbols is given in the middle. For each symbol shown, please estimate the percentage (%) of the United States population you think will understand what it means. A number of 100% means everybody would understand and 0% means absolutely nobody would understand. Like in the example below, you should write the percentage (%) in the circle next to the symbol. The symbols are not in a particular order.
